PCC Joint Sealant/HMA Crack Sealant
Technical Committees Conference Call
April 20, 2015

Attendees: Allen Gallistel (MNDOT), Sam Lawhorn (NCDOT), Bill Real (NHDOT), Sue Dearborn (NHDOT), Joe Putherickal (IADOT), Henry Lacinak (AASHTO), Brian Korschgen (AASHTO), Katheryn Malusky (AASHTO)

1. DataMine release status updates:
   a. Joint Sealants
      All JS data has been received and is now released to manufacturers.
   b. Crack Sealants
      VTDOT released data to lead state for review. All CS data was entered on April 15th and is now out for the final review by Allen Gallistel.

2. Field testing updates:
   a. Joint Sealants
      NCDOT will do last reading on 2012 products (4 products) around March 2016.
      2015 field evaluations will continue in North Carolina.
   b. Crack Sealants
      VTDOT released last field data for 2012 products. They should have no more field readings to take.
      2015 field evaluations expected to take place in Texas. Awaiting final confirmation.

3. Possible/probable Texas CS 2015 test deck update
   Richard Williammee from TXDOT is interested in hosting test deck. Their research group will look at work plan and recommend any changes. We are still waiting on Texas for full commitment and logistics. This needs to be finalized before cycle can open. We need to add fees for recertification (lab testing only) to the JSCS fee structure for 2015 cycle.
   Next testing cycle for JS/CS is due to open on April 27th. Opening of 2015 cycle will be delayed if determination of field testing has not been finalized.

4. Items for Annual Meeting agenda – Agenda needed by May 1st.
   Chair/vice chair needs to be confirmed or re-established
   Contact Jason Tremblay
   [(802) 828-6987 – new phone number]
a. Mastics - We need to look at adding Mastics testing to the NTPEP scope. We may need to look at ASTM for any specification to include in potential NTPEP evaluation.

b. Recertification - wording needs to be clarified in the work plan. Clarification is needed in work plan to define 3 years. Where does the clock start for re-certification? 3 years is currently listed but from what point? When, or should we, archive products? Bill Real suggested if products have a 2012 number – then next submittal should be 2015. However, 2012 products may not be installed until 2013. This will be agenda item for annual meeting.

c. Outreach – get to other areas of DOT and other states – Maintenance, etc.
   i. Katheryn will be presenting at AASHTO Bridges Meeting this week in order to promote

d. The fees for lab recertification need to be determined as they are not currently available. Fees will be added for lab testing only (recertification) for the 2015 submission cycle. Henry and Brian will work on the pricing and wording of change. (Review survey results.)

e. User guide rework. We do have a user guide but it probably needs more info. Need 2012 word version for edits. Allen Gallistel will reach out to Jim McGraw for the document.

5. Annual Meeting – May 17 – 21 Scottsdale, AZ
   Remember to register for meeting online if you have not yet done so.
