Rapid Set Concrete Patch Materials (RSCP)
Technical Committee Conference Call
September 10th, 2015

Attendees: Nikita Reed (FLDOT), Richard Delorenzo (FLDOT), Mark Nelson (Nelson Testing), Brad Young (OHDOT), Brian Korschgen (AASHTO), Maribel Wong (AASHTO), Rick Carpenito (MassDOT), Rich Mulcahy (MassDOT), Ashish Dubay (USG), Maribel Wong (AASHTO), Merrill Zwanka (SCDOT), Temple Short (SCDOT), Grant Kao (CTS Cement), Bill Goss (NYDOT)

1. Program Status Update
   a. NTPEP Liaison Change   Brian Korschgen has taken another position at AASHTO and is transitioning out of NTPEP. Maribel Wong will become the new NTPEP Liaison for this committee.
   b. 2015 Submittals – 12 Products (1 product was withdrawn). 7 products will need field testing, the other products are vertical/overhead or recertification which does not need field testing.
      i. Sampling notifications coming  Hoping to send out by next week
      ii. Field Installation Schedule  Bridge deck they were planning on using may not work so district is looking for another site. Brad will let Nikita know when field testing will be.
      iii. Field testing- (year 1 and year 2) for old products will take place in October as well.

2. Work Plan – Changes due to NTPEP by 11/3/15
   a. Compressive strength sample size of polymer materials will be updated to follow C579. This change will be made in the work plan.
   b. Are there any suggested changes based on the reviews of current work plan and last conference call?
      i. Should compressive strength of polymer materials be changed to 7 days only? No responses from TC, will not make this change to the work plan.
      ii. Should slant shear testing of polymer materials be changed to 7 days (removing 1 day testing)? No responses from TC, will not make this change to the work plan.
      iii. Any more information on applicability of TP 95 (surface resistivity) to various product types? No discussion on this
3. Data Analysis
   a. Suggestion was made to do some analysis on the data that is generated. How do we want to proceed? What do we have? What do we want to know? What are our priorities? DataMine 3.0 will have an expanded data export sheet that will make it much easier to analyze data from all testing for different products. The proposed Data Export for 3.0 was distributed to the committee. Please give feedback if any changes are needed.

4. Open Discussion Should we allow non field testing required products to be submitted and tested anytime throughout the year? No written policy changes will be made; however, NTPEP can make exception if product needs to be tested ASAP and Mark Nelson is able to accept the product.

5. Next Conference Call - December? January seems to be the best option for the call. An invite for this call will be sent out.
