- Richard gave a brief overview of the committee
  - Talked about products that were submitted to the program

1) Looking for more northern states to assist in evaluation of snow plowable pavement markers.
- Still looking for a state
  - Ohio has a lot of things on their plate and may not be able to accommodate more products
  - Going to wait to see how many submissions we get before we ask for volunteers

2) Action Item
- Some changes made to Work Plan about 2 years ago
- No new Action Items

3) Open Discussion
- Going to reduce the number of conference calls to every 6 months.
- Brad mentioned that the final evaluation for one of the products will be pushed from 24 to 22 months because the roadway is being repaired.
- Not a lot going on, samples are out on roadways and in the midst of testing.
- May want to consider a webinar instead of an in person meeting at the Annual Meeting.

4) End
